

HELLO ~🎵

IS IT ME YOU'RE LOOKING FOR?

10 years of work experience as creative being in multi-disciplinary design, has built my ethos. Not only by using design as visual language, aesthetically, but also to create values for the business I work for. Currently freelancing while sharpening more skill.

Graduated from agency, TVC production house, consultant and also wholesale - retail business company, have shaped me to be adaptable to various projects and to come up with simplest yet innovative ideas at solving problem.

My most recent projects are corporate, UI/UX, and web design, and I'm super excited to dive more into it. I doodle, travel, run, enjoy long walk, love puzzle and movies, play ukulele, and love taking photos without me in it. Ooh, and karaoke is my thing :D
